

NEW!

First belt lubrication nozzle made of solid plastic

Material
POM

Flow rate
0.1 l/min at 3 bar

Spray angle
75° at 3 bar

Connection
Assembly with 3/8" lock nut

The one-piece solid plastic nozzle from Lechler. Your solution for a cost-effective belt lubrication.

Advantages

- Cost-effective version by mold injection production.
- 1:1 interchangeable by conventional belt lubrication nozzles. Existing nipple and lock nut can further be used.

Applications

- Belt lubrication
- Atomization of smallest liquid volumes

Ordering number: 652.185.56.03
